Discover • Link • Solve

The Chorus Intelligence Suite (CIS) is a powerful investigation platform designed to help turn data into intelligence. The CIS brings together multiple sources—such as historical data, CDRs, LPRs, OSINT, and financial records—into a single, searchable workspace. With tools for data cleansing, visualization, federated search, and secure case management, investigators can quickly uncover patterns, connect entities, and share findings securely. The CIS also features anonymous OSINT capture and advanced enrichment capabilities to streamline complex investigations. The CIS empowers your team to analyze, collaborate, and make evidence-driven decisions — faster and with greater confidence. Built with investigators in mind, and trusted globally, the CIS helps agencies stay ahead in a world where data is mounting and actionable leads are critical.

CODY COBRAnet

CODY Systems supports the NFCA's goal to connect all our nation's fusion centers together under one data interoperability and 'one-stop search' network, such that an analyst at any center has instant access to data resources from across ALL centers at their fingertips, without requiring every center to forklift out / replace its existing data systems. The PA State-wide Commonwealth Automated Police Exchange (CAPE), powered by COBRAnet technology from CODY Systems, demonstrates how data being shared across disparate vendors / systems / domains and from both individual systems and different sharing networks can come together to form real-time, actionable intelligence, all without the cost-prohibitive need for agencies to change their existing data systems. This proven 'network of networks' approach bridging technology and governance presents an opportunity for fusion centers to up their data-sharing game by adopting cross-center sharing and collaboration.

CSI Technology Group

CSI Technology Group has over 30 years of experience designing robust, fully configurable eGovernment software. During this time, the company has matured into a successful software and service provider in the public safety, criminal justice, intelligence, prosecutorial, and judicial domains. CSI equips agencies with our patented InfoShare® Engine, a single low-code development platform powering our diverse applications and modules for seamless integration.

Our 28 CFR Part 23 compliant Intelligence module gathers, organizes, and analyzes intelligence data while exchanging and disseminating information across agencies. Our Fusion Center management solutions are developed to maintain situational awareness for any type of incident using advanced analytical tools to identify crime trends and produce actionable intelligence and investigations. As a customer-first organization, the best measure of ROI is a satisfied customer, which is why our users benefit from constant collaboration and personalized care.

esri® | THE SCIENCE OF WHERE®

Esri is the global leader in location intelligence, delivering powerful Geographic Information Systems (GIS) technology to support homeland security and national law enforcement missions across the globe. Esri's GIS solutions help fusion centers and public safety agencies integrate and analyze diverse data—such as crime reports, SARs, social media threats, and more—within a geographic context. Paired with detailed indoor maps, tactical planning tools, and real-time feeds, GIS transforms complex data into actionable intelligence.

Whether you're detecting emerging threats, coordinating rapid response, or planning long-term strategy, Esri helps you uncover hidden patterns, assess risk, and act with precision. By putting location at the center of your operations, you can enhance situational awareness, strengthen interagency collaboration, and build safer, more resilient communities.

FLASHPOINT

Flashpoint is the leader in threat data and intelligence. We empower mission-critical businesses and governments worldwide to decisively confront complex security challenges, reduce risk, and improve operational resilience amid fast-evolving threats. Through the Flashpoint Ignite platform, we deliver unparalleled depth, breadth and speed of data from highly relevant sources, enriched by human insights. Our solutions span cyber threat intelligence, vulnerability intelligence, geopolitical risk, physical security, fraud and brand protection. The result: our customers safeguard critical assets, avoid financial loss, and protect lives. Discover more at flashpoint.io.

Google Cloud

Security   Google Threat Intelligence

Google Threat Intelligence (GTI) revolutionizes cybersecurity by integrating insights from Mandiant, VirusTotal, and Google's vast ecosystem. It offers unmatched visibility into threats, leveraging over 1,100 annual incident investigations, 500+ global threat experts, and intelligence from 4 billion protected devices.

GTI goes beyond traditional threat feeds, providing actionable insights through human-curated intelligence, frontline expertise, crowdsourced data via VirusTotal, and Google's own extensive threat insights. It also incorporates open-source intelligence for a holistic view.

AI-infused with Gemini, GTI prioritizes relevant threats, distills complex information, and automates responses, allowing security teams to be proactive instead of reactive. It offers a unified verdict on indicators, streamlines workflows, and provides direct access to Mandiant experts for tailored guidance, helping organizations quickly understand and mitigate threats.

KASEWARE

Kaseware is an investigative case management system that is a modern, cloud-based application using the latest technologies and user interface designs to provide a best-in-class and intuitive user experience. Kaseware helps users collect and share information and intelligence, create statistical reports, perform link & geospatial analysis, disseminate information, and provide leadership the ability to supervise complex operations within their agency. Kaseware was built by the same team of individuals who developed the case management system used today by the Federal Bureau of Investigations (FBI).

Kaseware is a highly flexible and configurable system that allows customization of elements such as routing rules, forms, access controls, user groups, dashboards, and much more – including easy and secure sharing between agencies. It is designed to meet the needs of organizations and enable them to implement a bespoke system, tailored around their mission statement.

OSINT COMBINE | NexusXplore

OSINT Combine is a US-owned, Australian veteran-founded business, that develops enduring open-source intelligence (OSINT) capability within organizations by providing advanced OSINT solutions through its premier software platform, NexusXplore, and acclaimed training programs. The NexusXplore (NX) platform is an all-in-one, AI-powered, investigation-agnostic software platform, built by intelligence industry experts at OSINT Combine. NX optimizes analyst workflows and enhances a professional's ability to swiftly illuminate insights, supporting investigations, threat detection and intelligence production in a low-attribution environment. NX provides advanced search and collection capabilities across the surface, deep and dark webs in a single user interface. It delivers speed to insight from collection to intelligence production by seamlessly combining thousands of commercially and publicly available datasets in a secure, browser-based ecosystem - all you need is an internet connection!

INTELLIGENCE
PORTAL

The Hoozin Intelligence Portal is a secure, CJIS-compliant platform designed to streamline information sharing for fusion centers and law enforcement agencies. Featuring a user-friendly interface similar to social media platforms, it organizes content into communities of interest, ensuring stakeholders receive relevant updates. Key features include a consolidated daily intelligence briefing email, urgent alert capabilities, and a searchable repository of controlled-access intelligence products. The portal enhances collaboration, reduces inbox clutter, and ensures timely dissemination of sensitive-but-unclassified information. Adopted by agencies like SIAC and PACIC, it supports real-time crime centers and information sharing and analysis centers in improving operational efficiency and stakeholder engagement.

samdesk

Samdesk is a real-time, all hazards, risk detection and situational awareness platform built for GSOCs, fusion centers, crisis teams, and security leaders protecting people and infrastructure. Combining AI-powered detection with analyst validation in under 60 seconds, samdesk delivers verified, confidence-scored alerts 30–90 minutes faster than traditional systems. Its zero-blind-spot coverage scans billions of open-source signals and licensed feeds—including Reddit, Citizen, and ProMED—to detect emerging threats others miss. Alerts are triaged and summarized for rapid decision-making. Fully compliant, API-first, and deployable in under three hours, samdesk reduces noise and empowers public safety teams to act with clarity. Visit samdesk.io for more information.

Protective Threat Intelligence

For over two decades, SITE Intelligence Group has been a key resource for law enforcement and intelligence agencies, providing critical data and reporting on terrorist and violent extremist online networks.

SITE aids in threat mitigation and investigation through actionable analyses known as Enterprise Alerts, which have proven invaluable for Fusion Centers. Known for its premier open-source intelligence reporting, SITE offers the largest commercially available human-verified dataset, SourceFeed, compiling Publicly Available Information from extremist and terrorist-linked platforms. SITE also maintains the state-of-the-art SourceFeed-powered Boolean search engine, SearchFeed, enabling users to conduct precise queries and reverse image searches while avoiding direct engagement with malicious forums and online platforms. Committed to enhancing law enforcement and intelligence agency public safety operations, SITE remains at the forefront of countering violent extremism and terrorism online.

★ TRAPWIRE

TrapWire is a behavior-based threat detection platform purpose-built for fusion centers, law enforcement, and critical infrastructure protection. It specializes in identifying pre-attack surveillance and suspicious activity patterns, enabling agencies to intervene before threats materialize. Unlike traditional reporting systems, TrapWire integrates AI, advanced behavioral analytics, and automated pattern recognition to transform SARs into actionable intelligence. With secure real-time information sharing and available eGuardian integration, TrapWire enhances collaboration across jurisdictions. Its modular architecture allows deployment at local, regional, and national levels. TrapWire is fully compliant with 28 CFR Part 23 and CJIS standards, and supports scalable, alert-focused dashboards tailored to fusion center workflows. Whether monitoring emerging threats or collaborating on an investigation, TrapWire empowers teams to make proactive, data-driven decisions. Book at demo with us at Booth #221 during NFCA 2025 to see how TrapWire strengthens situational awareness and public safety readiness. Book Here.

✷ TRM

TRM Labs equips law enforcement agencies with the tools to investigate and disrupt crypto-enabled crime. Our blockchain intelligence platform helps trace illicit funds, identify actors, and support prosecutions.

Trusted by agencies worldwide, TRM enables:

- **Multi-asset tracing** across 30+ blockchains in a single view
- **Attribution and entity mapping** for darknet markets, mixers, and threat actors
- **Real-time alerts** on high-risk transactions and wallet activity
- **Seizure support** through on-chain asset tracing and documentation
- **Expert training** and case support from former law enforcement professionals

From ransomware and narcotics to fraud and human trafficking, TRM helps you follow the money—fast, accurately, and with mission-ready precision.

VIGILITI More than 93% of violent crime has behavioral warning signs - and yet goes unreported. VIGILITI is a force multiplier for good.

The patented VIGILITI AI chatbot is trained to NTER, NSI and CSAM standards to amplify Suspicious Activity (SAR) and non-emergency tips and leads reporting. The chatbot empowers concerned citizens to provide high fidelity, actionable information in real-time on individuals, groups, and movements that are likely to engage in violence or illegal activity.

Our application integrates with all major case management software (CMS) used by NFCA partners such as Fusion Centers, Real-Time Crime Centers (RTCC), police, sheriff and other law enforcement. Threat analyst efficiency is dramatically enhanced saving desk hours by eliminating manual entry and allowing analysts to focus on important tasks and critical investigations.

VIGILITI supports simultaneous international, national, regional, and local organizations to both, provide near-term operational capabilities to protect from emerging threats, and transform the way law enforcement responds.

OWL
INTELLIGENCE PLATFORM

Whooster and OWL: smarter investigations through connected data, Whooster equips investigators with real-time accurate data across social media, people, phones, vehicles, etc. — accessible via Web, API, or Texting/SMS, even without internet access. Whooster's proprietary Data Fusion engine links and verifies information quickly, helping teams reduce time and uncover key insights from billions of public and private records in a matter of seconds. OWL compliments this by transforming unstructured data including PDFs, spreadsheets, images, and videos into searchable actionable intelligence. Investigative professionals use OWL to centralize data, automate workflows, detect anomalies, and securely collaborate across teams and other agencies. With powerful visualization tools and real-time query capabilities, OWL enables expedited results with faster decision-making to support the mission of ensuring public safety. Together, Whooster and OWL help law enforcement organizations reduce manual effort, increase data clarity, and act decisively when time and accuracy matter most.
